PROCEDURE

Checklist

Final check: watch the video on your phone, where visual glitches are easier to notice.

1 Final Handover Check

Confirm every item below on every video before delivery:

- ☐ The face remains attractive and consistent from start to finish.
- ☐ The expression and eyes look natural.
- ☐ The body matches the model and does not change shape.
- ☐ Hands and limbs are not warped.
- ☐ There are no frozen or duplicated frames.
- ☐ Clothing and accessories remain consistent.
- ☐ The handbag or other objects do not switch sides.
- ☐ The background does not change unnaturally.
- ☐ There are no random objects, letters, or AI artifacts.
- ☐ Colors, sunlight, and weather look realistic.
- ☐ Any speed adjustment looks natural.
- ☐ Audio is aligned and the music fits.
- ☐ This version feels meaningfully different from the rest of the batch.

Ask yourself: does this video genuinely feel different from the other versions? If not, change the opening frames, music, speed, pacing, or a subtle color adjustment.
